

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Date	30 September 2026
Team ID	6ab24cc65bdbdc53c88cee
Project Name	Streamlining IT Procurement: Automating Standard Laptop Orders with Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR 1	Load spreadsheet data into the Employee Import table	Import Set
FR 2	Upload employee data from Excel/Spreadsheet	Import Set
FR 3	Management Create Employee Import table Store	imported spreadsheet data in the Import Set table
FR 4	Transform Map Create Sample Spreadsheet Import Transform Map	Select Employee Import as Source Table

FR 4

imported data into the
Employee Test table

FR 5

Field Mapping &

Data Transformation

**Duplicate Prevention
& Validation**

Select Employee Test
as Target Table

Map Employee ID,
Employee Name,
Email, Department and
Location Transform

Use Coalesce to
prevent duplicate
employee records
Verify inserted,
updated and ignored
records through
Transform History

FR 6

Reports & Dashboard

Generate
Employees by Department report

report

Create Employee List Report

Display reports in Employee
Analytics

Dashboards

Generate Employees by Location

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

Non-Function al Description

NFR No.

Requirement

employee
records.

NFR -2

NFR -1

Usability The solution should
provide a simple and easy process
for uploading spreadsheet data,
mapping fields and validating

NFR -3

NFR -4

NFR -5

NFR -6

Security Employee data should be handled securely within the ServiceNow platform and access should be provided only to authorized users.

Reliability The system should import employee records accurately and maintain correct data during repeated imports.

Performance The system should process spreadsheet data and transform employee records efficiently without unnecessary delays.

Availability The employee import, validation, reporting and dashboard features should be available whenever the ServiceNow system is accessible.

Scalability The solution should support increasing numbers of employee records and repeated spreadsheet imports without affecting the overall functionality.
